Volume 42 (2001)

A thank you to the experts who support the Editorial Board

The editors wish to express their gratitude and appreciation to all those specialists in radiology, physics and other fields who have so greatly contributed to the process of reviewing the manuscripts for *Acta Radiologica*. We sincerely hope that this sometimes very difficult and time-consuming analysis of manuscripts has been of value in their own research and not only a burden.

SUBJECT INDEX TO VOLUME 42 (2001)

Nervous system (incl. skull)

Contrast-enhanced T1-weighted black-blood fast spin-echo MR imaging of the brain. Technique for suppression of enhancing venous signal 27
Cerebrospinal fluid flow in children with normal and dilated ventricles studied by MR imaging 33
MR diffusion imaging and ^{1}H spectroscopy in a child with medulloblastoma. A case report 39
CTA in patients with acute subarachnoid haemorrhage. A comparative study with selective, digital angiography and blinded, independent review 43
Perfusion-related parameters in intravoxel incoherent motion MR imaging compared with CBV and CBF measured by dynamic susceptibility-contrast MR technique 123
High signal intensity of the posterior pituitary gland on T1-weighted MR images. Correlation with plasma vasopressin concentration to water deprivation 129
Cerebral air emboli from angiography in a patient with stroke. A case report 140
Post-traumatic cerebral infarction. Neuroimaging findings, etiology and outcome 254
Large middle cerebral artery infarctions and the hyperdense middle cerebral artery sign in patients with atrial fibrillation 261
Diffusion-weighted MR and apparent diffusion coefficient in the evaluation of severe brain injury 365
Neonatal periventricular-intraventricular hemorrhage. Subacute and chronic MR findings 370
Diffusion tensor trace mapping in normal adult brain using single-shot EPI technique. A methodological study of the aging brain 447
MR in phenylketonuria-related brain lesions 459
Radiologic-pathologic correlation of the hyperdense middle cerebral artery sign. A case report 467
Pre-operative grading of intracranial glioma. Comparison of MR-determined cerebral blood volume maps with thallium-201 SPECT 548
Brain MR perfusion imaging in humans. Advantages of high-molarity gadolinium chelates 555
Assessment of the arteriovenous cerebrovascular system by multi-slice CT. A single-bolus, monophasic protocol 560
Isolated neurosarcoidosis – MR findings and pathologic correlation. A case report 563

Ear, nose, throat and eye

CT of the oral vestibule with distended cheeks 84
The combined use of US and MR imaging for the diagnosis of masses in the parotid region 88
Contrast-enhanced ultrasound Doppler examination of the retrobulbar arteries 135
Complementary role of MR imaging of ethmomaxillary sinus disease depicted at CT in cystic fibrosis .. 144
Doppler sonography of the deep lingual artery 306
Detection of occult metastatic lymph nodes in the neck with gray-scale and power Doppler US 312
Large vestibular aqueduct in distal renal acidosis. High-resolution MR in three cases 320
MR imaging of the lingual thyroid. Comparison to other submucosal lesions 376
CT characterization of developmental variations of the paranasal sinuses in cystic fibrosis 482
Value of high-resolution MR in patients scheduled for cochlear implantation 568
Visualization of inner ear dysplasias in patients with sensorineural hearing loss. High-resolution MR imaging and volume-rendered reconstructions 574
3D steady-state MR cisternography in CSF rhinorrhoea 582

Bones, joints and soft tissues

Pre-operative radiotherapy in soft tissue tumors. Assessment of response by static post-contrast MR imaging compared to histopathology 1
The knee joint in early juvenile idiopathic arthritis. An ROC study for evaluating the diagnostic accuracy of contrast-enhanced MR imaging 6
MR imaging in chronic rupture of the ulnar collateral ligament of the thumb 10
Age-related changes in cortical and trabecular bone mineral status. A quantitative CT study in the lumbar vertebrae 15
Vertebral pneumatocysts 20
MR and other imaging methods in the investigation of mycetomas 24
The prevalence of disc aging and back pain after fusion extending into the lower lumbar spine. A matched MR study twenty-five years after surgery for adolescent idiopathic scoliosis 187
Early response of breast cancer bone metastases to chemotherapy evaluated with MR imaging 198
Radiographic measurement of femorotibial rotation in weight-bearing. The influence of flexion and extension in the knee on the extensor mechanism and angles of the lower extremity in a healthy population 207
Femorotibial rotation and the Q-angle related to the dislocating patella 218
MR evaluation of chronic Achilles tendinosis. A longitudinal study of 15 patients preoperatively and two years postoperatively 269
Dynamic contrast-enhanced MR imaging in symptomatic bone stress of the pelvis and the lower extremity 277

Direct MR arthrography of plica synovialis mediopatellaris 286
A comparative study of MR imaging profile of titanium pedicle screws 291
Vascularization of malignant and benign skin tumours measured by D-galactose-based signal-enhanced colour Doppler sonography 294
MR-guided core biopsies of soft tissue tumours on an open 0.23 T imager 302
MR imaging of primary, secondary, and mixed forms of lymphedema 409
MR imaging of displaced meniscal tears of the knee. Importance of a "disproportional posterior horn sign" 417
MR findings in humeral epicondylitis. A systematic review 434
Supraspinatus outlet view in the diagnosis of stages II and III impingement syndrome 441
Apparent diffusion coefficients and T2 relaxation time measurements to evaluate disc degeneration. A quantitative MR study of young patients with previous vertebral fracture 582
Digital skeletal radiography. Reduction of absorbed dose by adaptation of exposure factors and image processing 592
Spinal dural AV fistula mimicking a vertebral neoplasm. Short communication 618

Breast

B-mode, power Doppler and contrast-enhanced power Doppler ultrasonography in the diagnosis of breast tumors 106
Abscesses of the breast. US-guided serial percutaneous aspiration and local antibiotic therapy after unsuccessful systemic antibiotic therapy 161
Dynamic helical CT-guided needle localization of nonpalpable and mammographically occult breast lesions. Case reports 383
Marking of nonpalpable breast lesions using a custom carbon suspension 599

Cardiovascular system

Contrast-enhanced thoracic 3D-MR angiography in infants and children 50
CT-guided aspiration biopsy of infected aortic graft in a patient with hypertrophic osteoarthropathy. Saline injection to improve diagnostic yield – A case report 59
Pre-operative evaluation with MR in tetralogy of Fallot and pulmonary atresia with ventricular septal defect 63
Cerebral air emboli from angiography in a patient with stroke. A case report 140
Detection of myocardial ischemia by electron beam CT. Experimental studies 386
Long-term results of combined surgical and radiological intervention in complicated aortic dissection type-A. A case report 393
Stent placement in short unilateral iliac occlusion. Technique and 24-month results 508
Contrast agent distribution in microvascular damage of infarcted pig myocardium 515
Cardioprotective effects of the MR contrast agent MnDPDP and its metabolite MnPLED upon reperfusion of the ischemic porcine myocardium 540
Assessment of the arteriovenous cerebrovascular system by multi-slice CT. A single-bolus, monophasic protocol 560

Mediastinum and respiratory system

CT-guided percutaneous core biopsies of pulmonary lesions. Diagnostic accuracy, complications and therapeutic impact 151
Effects of JPEG and wavelet compression of spiral low-dose CT images on detection of small lung cancers 156
Severe liver injury with hematological disorders following the injection of non-ionic contrast medium. A case report 342
Pulmonary sarcoidosis. Correlation of expiratory high-resolution CT findings with inspiratory and pulmonary function tests 494
Evaluation of pleural disease using MR and CT. With special reference to malignant pleural mesothelioma 502

Digestive tract

Palliative treatment of inoperable malignant esophageal strictures with conically shaped covered self-expanding stents 166
Self-expandable metal stents in the treatment of antropyloric and/or duodenal strictures 176
Gastro-oesophageal reflux demonstrated by radiography. A supplement to 24-h pH monitoring . . . 521

Liver, biliary tract

Mucinous ductal ectasia of the biliary tree secondary to mucous metaplasia. A case report 114
Frequency of benign hepatic lesions incidentally detected with contrast-enhanced thin-section portal venous phase spiral CT 172
Hepatic subcapsular steatosis in diabetic CAPD patients treated with intraperitoneal insulin. Description of a typical pattern 323
Nontumorous perfusion abnormalitities of liver parenchyma adjacent to the falciform ligament as revealed by angiographic helical CT and angiography 398
Imaging and estimation of the prognostic features of primary sclerosing cholangitis by ultrasonography and MR cholangiography 403

The triple-phase CT image appearance of post-irradiated livers 526
Palliative treatment of hepatocellular carcinoma by chemoembolization 602

Spleen, pancreas

Splenic involvement in lymphomas. Evaluation on serial CT examinations 326

Abdomen

MR imaging of upper abdomen following cholecystectomy. Normal and abnormal findings 181

Urogenital system

Optimal timing of post-biopsy MR imaging of the prostate 70
Contrast-enhanced MR imaging of experimental acute tubular necrosis 74
Percutaneous transcatheter renal embolization with absolute ethanol for uncontrolled nephrotic syndrome. Case reports 80
Enhanced visualisation of the normal prostate blood flow in young healthy volunteers using a new ultrasound contrast agent 225
Doppler ultrasonography in testicular tumors presenting with acute scrotal pain 230
Uterine artery embolization of symptomatic uterine fibroids. Initial success and short-term results 234
Visualization of tumor vessels in renal tumors. Comparison between power Doppler ultrasonography and angiography 239
Safety of gadolinium contrast agent in hemodialysis patients 339
Prostatic MR imaging. Accuracy in differentiating cancer from other prostatic disorders 348
Long-term follow-up of reflux nephropathy in adults with vesicoureteral reflux – Radiological and pathoanatomical analysis 355
MR pyelography in 115 patients with a dilated renal collecting system 532

Endocrine system

High signal intensity of the posterior pituitary gland on T1-weighted MR images. Correlation with plasma vasopressin concentration to water deprivation 129
Doppler ultrasonography in testicular tumors presenting with acute scrotal pain 230
Treatment of autonomous and toxic thyroid adenomas by percutaneous ultrasound-guided ethanol injection 477

Lymphatic system

MR imaging of primary, secondary, and mixed forms of lymphedema 409
High-resolution and color Doppler ultrasonography of cervical lymphadenopathy in children 470

Pediatric radiology

Cerebrospinal fluid flow in children with normal and dilated ventricles studied by MR imaging 33
MR diffusion imaging and ^{1}H spectroscopy in a child with medulloblastoma. A case report 39
Contrast-enhanced thoracic 3D-MR angiography in infants and children 50
Neonatal periventricular-intraventricular hemorrhage. Subacute and chronic MR findings 370
High-resolution and color Doppler ultrasonography of cervical lymphadenopathy in children 470

Digital radiography

Digital skeletal radiography. Reduction of absorbed dose by adaptation of exposure factors and image processing 592

Ultrasonography

The combined use of US and MR imaging for the diagnosis of masses in the parotid region 88
B-mode, power Doppler and contrast-enhanced power Doppler ultrasonography in the diagnosis of breast tumors 106
Contrast-enhanced ultrasound Doppler examination of the retrobulbar arteries 135
Abscesses of the breast. US-guided serial percutaneous aspiration and local antibiotic therapy after unsuccessful systemic antibiotic therapy 161
Enhanced visualisation of the normal prostate blood flow in young healthy volunteers using a new ultrasound contrast agent 225
Doppler ultrasonography in testicular tumors presenting with acute scrotal pain 230
Visualization of tumor vessels in renal tumors. Comparison between power Doppler ultrasonography and angiography 239
Vascularization of malignant and benign skin tumours measured by D-galactose-based signal-enhanced colour Doppler sonography 294
Doppler sonography of the deep lingual artery 306
Detection of occult metastatic lymph nodes in the neck with gray-scale and power Doppler US 312
Hepatic subcapsular steatosis in diabetic CAPD patients treated with intraperitoneal insulin. Description of a typical pattern 323
Imaging and estimation of the prognostic features of primary sclerosing cholangitis by ultrasonography

and MR cholangiography 403
High-resolution and color Doppler ultrasonography of cervical lymphadenopathy in children 470
Treatment of autonomous and toxic thyroid adenomas by percutaneous ultrasound-guided ethanol injection 477

CT

Age-related changes in cortical and trabecular bone mineral status. A quantitative CT study in the lumbar vertebrae 15
Vertebral pneumatocysts 20
CTA in patients with acute subarachnoid haemorrhage. A comparative study with selective, digital angiography and blinded, independent review 43
CT-guided aspiration biopsy of infected aortic graft in a patient with hypertrophic osteoarthropathy. Saline injection to improve diagnostic yield – A case report 59
CT of the oral vestibule with distended cheeks 84
Estimation or quantification of tumour volume? CT study on irregular phantoms 101
CT-guided percutaneous core biopsies of pulmonary lesions. Diagnostic accuracy, complications and therapeutic impact 151
Effects of JPEG and wavelet compression of spiral low-dose CT images on detection of small lung cancers 156
Frequency of benign hepatic lesions incidentally detected with contrast-enhanced thin-section portal venous phase spiral CT 172
Post-traumatic cerebral infarction. Neuroimaging findings, etiology and outcome 254
Large middle cerebral artery infarctions and the hyperdense middle cerebral artery sign in patients with atrial fibrillation 261
Splenic involvement in lymphomas. Evaluation on serial CT examinations 326
Dynamic helical CT-guided needle localization of nonpalpable and mammographically occult breast lesions. Case reports 383
Detection of myocardial ischemia by electron beam CT. Experimental studies 386
Nontumorous perfusion abnormalitities of liver parenchyma adjacent to the falciform ligament as revealed by angiographic helical CT and angiography 398
Radiologic-pathologic correlation of the hyperdense middle cerebral artery sign. A case report 467
CT characterization of developmental variations of the paranasal sinuses in cystic fibrosis 482
Pulmonary sarcoidosis. Correlation of expiratory high-resolution CT findings with inspiratory and pulmonary function tests 494
Evaluation of pleural disease using MR and CT. With special reference to malignant pleural mesothelioma 502
The triple-phase CT image appearance of post-irradiated livers 526
Assessment of the arteriovenous cerebrovascular system by multi-slice CT. A single-bolus, monophasic protocol 560

MR and spectroscopy

Pre-operative radiotherapy in soft tissue tumors. Assessment of response by static post-contrast MR imaging compared to histopathology 1
The knee joint in early juvenile idiopathic arthritis. An ROC study for evaluating the diagnostic accuracy of contrast-enhanced MR imaging 6
MR imaging in chronic rupture of the ulnar collateral ligament of the thumb 10
MR and other imaging methods in the investigation of mycetomas 24
Contrast-enhanced T1-weighted black-blood fast spin-echo MR imaging of the brain. Technique for suppression of enhancing venous signal 27
Cerebrospinal fluid flow in children with normal and dilated ventricles studied by MR imaging 33
MR diffusion imaging and ^{1}H spectroscopy in a child with medulloblastoma. A case report 39
Contrast-enhanced thoracic 3D-MR angiography in infants and children 50
Pre-operative evaluation with MR in tetralogy of Fallot and pulmonary atresia with ventricular septal defect 63
Optimal timing of post-biopsy MR imaging of the prostate 70
Contrast-enhanced MR imaging of experimental acute tubular necrosis 74
The combined use of US and MR imaging for the diagnosis of masses in the parotid region 88
Mucinous ductal ectasia of the biliary tree secondary to mucous metaplasia. A case report 114
Perfusion-related parameters in intravoxel incoherent motion MR imaging compared with CBV and CBF measured by dynamic susceptibility-contrast MR technique 123
High signal intensity of the posterior pituitary gland on T1-weighted MR images. Correlation with plasma vasopressin concentration to water deprivation 129
Complementary role of MR imaging of ethmomaxillary sinus disease depicted at CT in cystic fibrosis . . 144
MR imaging of upper abdomen following cholecystectomy. Normal and abnormal findings 181
The prevalence of dics aging and back pain after fusion extending into the lower lumbar spine. A matched MR study twenty-five years after surgery for adolescent idiopathic scoliosis 187
Early response of breast cancer bone metastases to chemotherapy evaluated with MR imaging 198
Post-traumatic cerebral infarction. Neuroimaging findings, etiology and outcome 254

MR evaluation of chronic Achilles tendinosis. A longitudinal study of 15 patients preoperatively and two years postoperatively 269
Dynamic contrast-enhanced MR imaging in symptomatic bone stress of the pelvis and the lower extremity 277
Direct MR arthrography of plica synovialis mediopatellaris 286
A comparative study of MR imaging profile of titanium pedicle screws 291
MR-guided core biopsies of soft tissue tumours on an open 0.23 T imager 302
Large vestibular aqueduct in distal renal acidosis. High-resolution MR in three cases 320
Hepatic subcapsular steatosis in diabetic CAPD patients treated with intraperitoneal insulin. Description of a typical pattern 323
Prostatic MR imaging. Accuracy in differentiating cancer from other prostatic disorders 348
Diffusion-weighted MR and apparent diffusion coefficient in the evaluation of severe brain injury 365
Neonatal periventricular-intraventricular hemorrhage. Subacute and chronic MR findings 370
MR imaging of the lingual thyroid. Comparison to other submucosal lesions 376
Dynamic helical CT-guided needle localization of nonpalpable and mammographically occult breast lesions. Case reports 383
Imaging and estimation of the prognostic features of primary sclerosing cholangitis by ultrasonography and MR cholangiography 403
MR imaging of primary, secondary, and mixed forms of lymphedema 409
MR imaging of displaced meniscal tears of the knee. Importance of a "disproportional posterior horn sign" 417
MR findings in humeral epicondylitis. A systematic review 434
Diffusion tensor trace mapping in normal adult brain using single-shot EPI technique. A methodological study of the aging brain 447
MR in phenylketonuria-related brain lesions 459
Evaluation of pleural disease using MR and CT. With special reference to malignant pleural mesothelioma 502
MR pyelography in 115 patients with a dilated renal collecting system 532
Pre-operative grading of intracranial glioma. Comparison of MR-determined cerebral blood volume maps with thallium-201 SPECT 548
Brain MR perfusion imaging in humans. Advantages of high-molarity gadolinium chelates 555
Isolated neurosarcoidosis – MR findings and pathologic correlation. A case report 563
Value of high-resolution MR in patients scheduled for cochlear implantation 568
Visualization of inner ear dysplasias in patients with sensorineural hearing loss. High-resolution MR imaging and volume-rendered reconstructions 574
3D steady-state MR cisternography in CSF rhinorrhoea 582
Apparent diffusion coefficients and T2 relaxation time measurements to evaluate disc degeneration. A quantitative MR study of young patients with previous vertebral fracture 585

Nuclear radiology

Pre-operative grading of intracranial glioma. Comparison of MR-determined cerebral blood volume maps with thallium-201 SPECT 548

Interventional radiology

CT-guided aspiration biopsy of infected aortic graft in a patient with hypertrophic osteoarthropathy. Saline injection to improve diagnostic yield – A case report 59
Optimal timing of post-biopsy MR imaging of the prostate 70
Percutaneous transcatheter renal embolization with absolute ethanol for uncontrolled nephrotic syndrome. Case reports 80
CT-guided percutaneous core biopsies of pulmonary lesions. Diagnostic accuracy, complications and therapeutic impact 151
Palliative treatment of inoperable malignant esophageal strictures with conically shaped covered self-expanding stents 166
Self-expandable metal stents in the treatment of antropyloric and/or duodenal strictures 176
Uterine artery embolization of symptomatic uterine fibroids. Initial success and short-term results 234
MR-guided core biopsies of soft tissue tumours on an open 0.23 T imager 302
Dynamic helical CT-guided needle localization of nonpalpable and mammographically occult breast lesions. Case reports 383
Long-term results of combined surgical and radiological intervention in complicated aortic dissection type-A. A case report 393
Treatment of autonomous and toxic thyroid adenomas by percutaneous ultrasound-guided ethanol injection 477
Stent placement in short unilateral iliac occlusion. Technique and 24-month results 508
Palliative treatment of hepatocellular carcinoma by chemoembolization 602

Experimental radiology

Contrast-enhanced MR imaging of experimental acute tubular necrosis 74
Estimation or quantification of tumour volume? CT study on irregular phantoms 101

Investigation of binding of ^{125}I-iodixanol to high molecular weight substances after incubation with rat liver homogenates 117
Abscesses of the breast. US-guided serial percutaneous aspiraton and local antibiotic therapy after unsuccessful systemic antibiotic therapy 161
Quantification of the ionising radiation effect over angiogenesis in the chick embryo and its chorioallantoic membrane by computerised analysis of angiographic images 333
Ionic and non-ionic contrast agent-mediated endothelial injury. Quantitative analysis of cell proliferation during endothelial repair 422
Contrast agent distribution in microvascular damage of infarcted pig myocardium 515
Cardioprotective effects of the MR contrast agent MnDPDP and its metabolite MnPLED upon reperfusion of the ischemic porcine myocardium 540

Contrast media and other drugs

Investigation of binding of ^{125}I-iodixanol to high molecular weight substances after incubation with rat liver homogenates 117
Safety of gadolinium contrast agent in hemodialysis patients 339
Severe liver injury with hematological disorders following the injection of non-ionic contrast medium. A case report 342
Ionic and non-ionic contrast agent-mediated endothelial injury. Quantitative analysis of cell proliferation during endothelial repair 422
Contrast agent distribution in microvascular damage of infarcted pig myocardium 515
Cardioprotective effects of the MR contrast agent MnDPDP and its metabolite MnPLED upon reperfusion of the ischemic porcine myocardium 540
Marking of nonpalpable breast lesions using a custom carbon suspension 599
Allergic reactions at repeat femoral angiography with ioxaglate 608

Physics and technique

The efficacy of a continuous quality improvement (CQI) method in a radiological department. Comparison with non-CQI control material 96
Estimation or quantification of tumour volume? CT study on irregular phantoms 101
Effects of JPEG and wavelet compression of spiral low-dose CT images on detection of small lung cancers 156
Radiographic measurement of femorotibial rotation in weight-bearing. The influence of flexion and extension in the knee on the extensor mechanism and angles of the lower extremity in a healthy population 207
Femorotibial rotation and the Q-angle related to the dislocating patella 218
Image quality in extended arc filtered digital tomosynthesis 244
Detection of myocardial ischemia by electron beam CT. Experimental studies 386
Radiological image data migration. Practical experience and comparison of the costs of work 426
Digital skeletal radiography. Reduction of absorbed dose by adaptation of exposure factors and image processing 592
Inadequacies of repeated radiological examinations in a university hospital 612

Reseach and methodology

The efficacy of a continuous quality improvement (CQI) method in a radiological department. Comparison with non-CQI control material 96
